

The Bead Shak

Friendship Pin Beading Instructions

String beads following the pattern, starting at the top with Row 1 and working down. Each row is a pin. Open a safety pin and slip the beads onto it.

Once all of the beads are on the pin, close it. Pinch the end with pliers to crimp the pin so it will not come open.

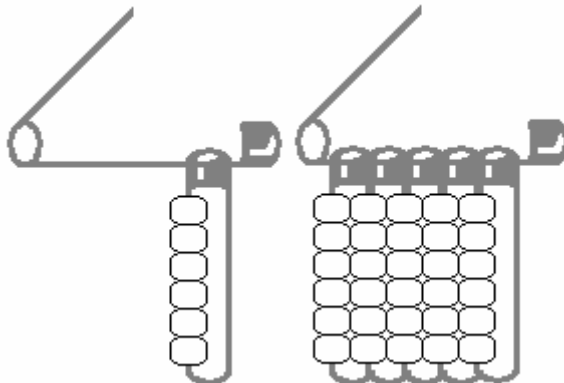

Repeat this step until all of your rows are beaded.

Now you will put the smaller beaded pins onto the large safety pin. Open the large safety pin. Using a screwdriver or other flat tool, carefully pry apart the coil at the end.

Following the pattern from left to right, slip the loop of the first beaded safety pin onto the large one. Pull it down and around the coil of the large pin and to the backside of the pin. Repeat this until you have all of your beaded safety pins on the large one.

Once all of your pins are onto the large one, use pliers to squeeze the coil loop closed. Congratulations! Your pin is finished.
